

## **Multidisciplinary research within environmental epidemiology**

### **Description:**

Increasing emphasis is being placed on multidisciplinary in health research. This workshop will examine the roles of multidisciplinary in epidemiology and how students and new researchers can incorporate multidisciplinary into their degrees, research and career trajectories. A number of researchers involved in different multidisciplinary areas will present their experiences and this will be followed by an structured discussion.

### **Speakers:**

- Berna van Wendel de Joode, Professor, Central American Institute for Studies on Toxic Substances , Universidad Nacional.
- Brenda Eskenazi, Professor, School of Public health, University of California Berkeley.
- Paul Demers, Director, Occupational Cancer Research Center, Cancer Care Ontario.
- Greet Schoeters, Professor, Environmental toxicology, Flemish Institute of Technological Research.
- Aaron Cohen, Principal Scientist, Health Effects Institute.
